

SOLUTION SHEET

Extend your Ellucian investment with the Axiom budgeting and planning suite

Easily integrate GL, HR, and SIS data on a single platform to improve financial decision-making

AXIOM

Syntellis' Axiom™ Higher Education Suite helps campus leaders balance growth with fiscal responsibilities to ensure sustained success in a rapidly changing business environment. The cloud-based suite provides sophisticated, industry-specific software that supports institutional planning and reporting on a single, integrated platform. Colleges and universities of every size can benefit from an intuitive end-user interface, flexible data model, and rich modeling capabilities.

Axiom empowers higher education leaders to maximize performance by leveraging best-practice methodologies and tools that have proven successful in colleges and universities across the United States and internationally.

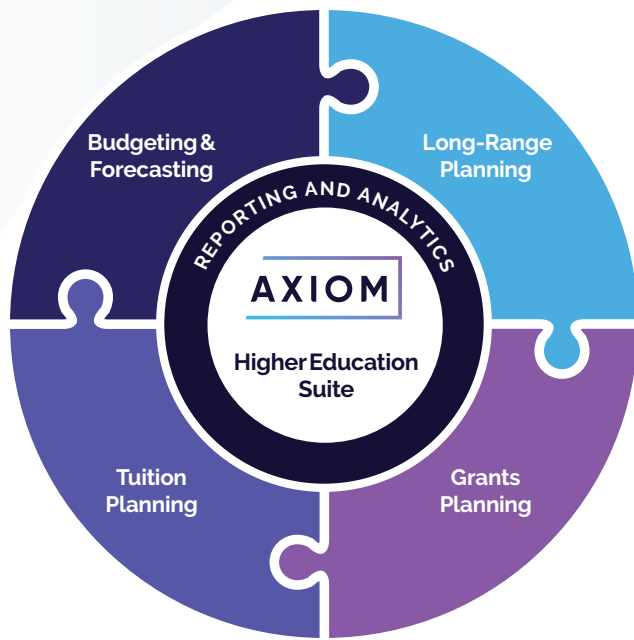

Seamless integration with Ellucian

Syntellis is an Ethos Connected Partner. The Ethos connection provides a streamlined integration among Axiom and Ellucian Banner, resulting in faster time-to-value and reduced overall implementation effort. Charged with helping institutions optimize financial and operational performance, our team of experts comprises senior-level professionals with deep higher education expertise, including many who have held finance positions at leading universities.

With Axiom, colleges and universities can:

- **Get a 360-degree view of finance data**, ensuring budgets are grounded in a firm understanding of the current state. Data transparency reduces budget cycle time and builds trust in budget processes.
- **Expedite informed financial decisions**, aligning budget data from Axiom and Ellucian to accelerate data-driven financial decisions that improve short- and long-term financial performance.
- **Turn insight into action with drill-through detailed reports**—including transactional data—to determine root causes and drive corrective action.
- **Get up and running quickly with our experienced team**. Our higher education consultants work with source tables to integrate detailed transactional data and chart-of-accounts metadata, ensuring efficient data integration.
- **View data in new ways, using multiple end-user interface options**, including spreadsheet and browser-based experiences, to accommodate various user types and experience levels.

The Axiom Higher Education Suite

- **Budgeting & Forecasting:** Shorten the budget cycle, improve security and transparency across campus budget officers, and improve in-year forecasting using imported labor, student, and general ledger data.
- **Long-Range Planning:** Develop 5- to 10-year financial plans using models and scenarios to mix and match assumptions and initiatives. Deliver executive-level dashboards showing the impact of external factors against plans and commitments.
- **Grants Planning:** Gain visibility into income and expenditures across a grant's life, and the financial impact of installments on budgets and forecasts.
- **Tuition Planning:** Model tuition rates and fees, and easily create scenarios that show the impact of changes.

The Axiom Higher Education Suite readily integrates with Ellucian, empowering higher education leaders to maximize performance by leveraging best-practice methodologies and tools that have proven successful in colleges and universities across the U.S. and internationally.

About Syntellis Performance Solutions

Syntellis Performance Solutions provides innovative enterprise performance management software, data and analytics solutions for higher education institutions. Our powerful budgeting, financial planning, and analytics solutions help colleges and universities elevate financial performance and transform vision into reality. With leading institutions using our flexible, powerful, intuitive Axiom software to manage nearly \$60 billion in revenue and \$100 billion in endowments, combined with top satisfaction rankings from BPM partners for the past eight years, Syntellis' proven industry expertise helps college and universities acquire insights, accelerate decisions, and advance their business plans.
