Ellucian Insights

Unlock the power of your institution's data

Data-driven decision-making relies on unified, well governed data. A single source of truth that integrates information from all systems for a holistic view of students, staff, and all factors that affect institutional performance.

Ellucian Insights is a SaaS-based reporting and analytics solution that allows institutions to unify their data across Ellucian and non-Ellucian sources with its data lake and data-warehouse-as-a-service. Data can be securely democratized across the institution with out-of-the-box reports and dashboards with intuitive data discovery, analysis, and visualization capabilities.
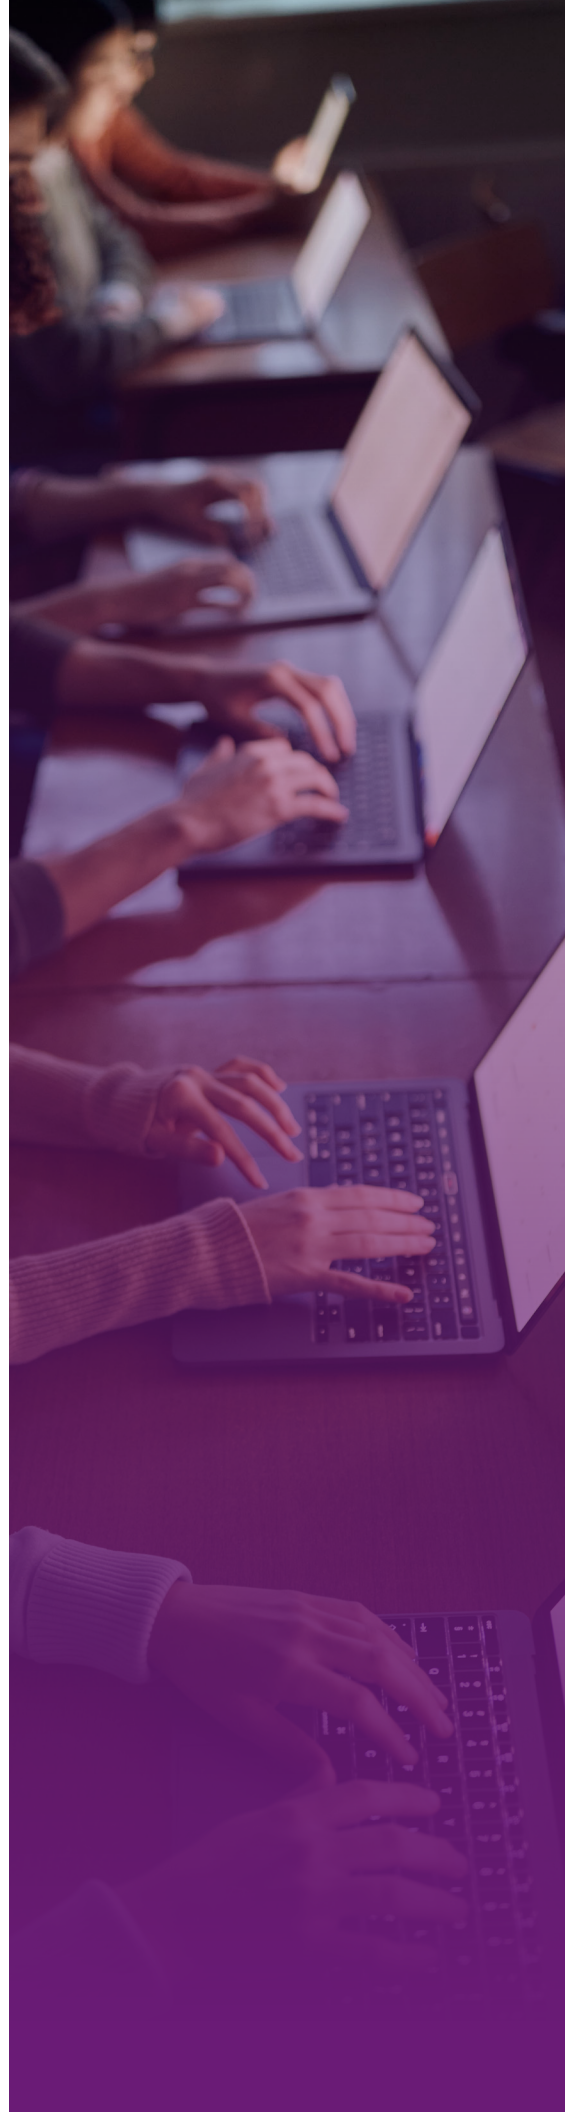

Unify Data

Ellucian SIS, ERP, and CRM data sources are seamlessly integrated into the data lake and data warehouse. Customers can snapshot data, build custom data transformations, and integrate third-party data sources.

Democratize Data

Campus-wide licensing and permission-based security features enable institutions to personalize experiences and ensure every constituent has the information they need at their fingertips. With a simple yet powerful reporting and analytics tool, functional users can discover and analyze data to easily generate their own insights.

Activate Data

Ellucian delivers purpose-built and customizable data models, reports, dashboards, and visualizations within Experience to help answer key institutional questions. Additionally, Insights offers the flexibility to use an intuitive, Experience-native report builder or leverage existing investments by bringing your own reporting tool.

Flexible, Purpose-built Features and Tiers

Ellucian Insights is a comprehensive data and analytics solution with packaging to meet the unique needs of our customers.
